

SKODA

Enyaq Coupé

Positively charged

The Skoda Enyaq Coupé – electric inside, sporty everywhere.

The unmistakable coupé aesthetic is underlined by the rear sloping roof that shapes the car's dynamic posture. But its sleek form doesn't betray function as the Enyaq Coupé still scores high on technology, space, practicality, and comfort.

Fully electric at heart, the instant acceleration complements the sporty styling while minimising your environmental footprint.

State-of-the-art connectivity services and assistance systems make sure you are looked after while you're looking good.

Welcome to the Enyaq Coupé.

Additional information

Electric, even on the outside

Different by design

The Enyaq Coupé is a perfect example of the Škoda design language's thoughtful evolution. New solutions are coming to the fore while preserving our brand values.

The design is perfectly harmonised with space and simply clever ideas. With its sporty body style and specific wheel design, the car excels in terms of aerodynamics, which means less energy consumption and an extended range.

Headlight design

The unique crystal structure, characteristic of Škoda design, emphasises the three-dimensionality of the headlights and transforms them into a work of art. The top-end option features full LED Matrix headlights, which offer an innovative road lighting solution and higher degree of safety. The combination of LED Matrix headlights and crystal lights over the entire face of the car is optional.

Dynamic signature

With its distinctive lines and sharp edges, the Enyaq Coupé looks dynamic even before it starts moving. This is also supported by the dynamically shaped rear lights penetrated deep into the wings. The top-end option comes with full LED rear lights decorated with crystalline elements and fitted with animated turn indicators. The full LED rear lights also feature the animation function (coming home and leaving home), which is activated when the doors are opened or closed.

Models shown are not UK specification. Some of the equipment shown is optional.

 Build your own

Models shown are not UK specification. Some of the equipment shown is optional.

Shining light

Crystal Face

This optional front grille features 130 LEDs and creates a dazzling strip between the headlights. The resulting Crystal Face turns on when the headlights are activated and powerfully illuminates the road ahead along with the dipped beam lights. In a car packed with eye-catching design features, few command more attention.

Aerodynamics and driving properties

Whether it's the body shapes, exterior details, or even the wheel design, the focus on minimum drag is evident. Positioning the battery under the floor – between the front and rear axle – gives the car optimal weight distribution. This results in excellent vehicle stability and handling.

Fixed Panoramic Roof

The coupé body design is visually enhanced by a panoramic glass roof, which stretches all the way from the windscreen to the sloping rear window.

Innovation at every turn

Connectivity to go wherever you go

By enabling you to be fully online on the go, the Enyaq Coupé keeps you fully informed at every corner and entertained at every turn.

Škoda Connect turns the Enyaq Coupé into a fully interconnected electric car, with a host of online services included as part of the Remote Services package.

Remote Charging

Control your charging in the palm of your hand with the Remote Charging app. You can not only track the status of the charge, but also set a predetermined charging time to help with off-peak charging.

Remote air conditioning

Your Enyaq Coupé, your way. That's the beauty of remote air con, which lets you schedule the car to be air conditioned at a specific time, so you'll always head off in absolute comfort.

Smart Schedules

Take full control of your charging schedule with this brand-new service. In addition to enabling you to take advantage of cheaper off-peak electricity tariffs, you can also create different charging settings based on the car's location, for example home or work. Just plug in the car and leave the rest to Smart Schedule. This clever service also allows you to set the temperature before you jump in the car, ideal for chilly winter nights or hot summer days.

eCALL

In the event of an emergency on the road, the Enyaq Coupé will automatically send an SOS signal for help to give you extra peace of mind. This is triggered as soon as the airbag or belt tensioners report a major accident.

Alternatively, you can press the manual SOS button to call the emergency services directly to report an accident or raise the alarm about another traffic incident you've witnessed.

Virtual Cockpit

The Enyaq Coupé showcases electric innovation at every turn. Dashboard included. Forget old-fashioned dials, here you'll find a full-colour Virtual Cockpit featuring a range of display layouts that can be toggled via the steering wheel. These include Basic, Navigation, Assist Systems, and Goodbye View.

Head-up Display

Cleverly designed to avoid distraction, the augmented reality head-up display shows key driving data in a way that's easy to absorb at a glance.

Virtual driving information, such as speed, navigation, and adaptive cruise control, is shown directly on the road in front of the vehicle, allowing you to stay informed while staying in full control.

Models shown are not UK specification. Some of the equipment shown is optional.

 Škoda Connect
Find out more

Small ideas for big impact

The Enyaq Coupé isn't simply emission-free, it's hassle-free too thanks to a host of thoughtful touches and smart storage spaces that make everyday use feel easier in every way.

Umbrella storage compartment

Never let a soggy day dampen your spirits again with this handy driver's door compartment. Designed to fit the original Škoda umbrella, it also cleverly drains water away from the car.

Cargo elements

To avoid any undesired movement of luggage while driving, these are stowed away in the compartments behind the rear wheel arches when not in use.

Foldable tables

Built into the backrests of both front seats, the foldable tables with drink holders can be used for more than just refreshments.

Double pocket

Free up your fingertips while still keeping your essentials close at hand with these double pockets on the back of the front seats.

Models shown are not UK specification. Some of the equipment shown is optional. Please note: Some combinations of options can cause the vehicle to be unbuildable. Please speak to your chosen **Škoda Retailer** (who act on our behalf) or visit **skoda.co.uk** to configure your required specification.

 Build your own

Storage compartments

In a car that's built for adventure, every extra inch of practical storage space quickly becomes an advantage. With this optional storage compartment you'll not only have a handy home for your charging cables under the variable boot floor, but space for your cargo elements, gloves, tools and more.

Models shown are not UK specification. Some of the equipment shown is optional. Please note: Some combinations of options can cause the vehicle to be unbildable. Please speak to your chosen **Škoda Retailer** (who act on our behalf) or visit **skoda.co.uk** to configure your required specification.

Added practicality, plain and simple

Net programme

This set of one horizontal and two vertical nets reliably prevents your items from moving around, while keeping them front of mind at all times.

Remote folding seats

The rear seats can be folded down using a remote release button located in the luggage compartment, which will make loading the car even more effortless.

Towing Device

The Enyaq Coupé can be equipped with a foldable towing device with electric release via a switch in the luggage compartment.

Please note, if a tow bar or tow bar preparation is not fitted on the car, the VIN plate may not show any towing weights and the car will never be eligible for towing. As such it may not be possible to retrospectively fit a tow bar if the car is not fitted with tow bar preparation at Factory. Please speak to your Retailer to confirm the exact towing eligibility.

Vehicle selector

Enyaq Coupé uses a completely new configuration system to build the vehicle of your choice. The four categories below are an ideal starting point, simply click on each heading for more details.

Figures shown are for comparability purposes; only compare electric range figures with other vehicles tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles, vehicle load and the starting charge of the battery. Figures for battery electric vehicles were obtained after the battery had been fully charged. Battery electric vehicles require mains electricity for charging. Data correct at 31st October 2023. Choice of wheels and other options may affect consumption and range data. Charging times will depend on various factors, including temperature, state of the battery, state of and capabilities of the charging unit and power supply. Actual charging time will vary depending on the level of charge in the battery, as well as environmental conditions. Charging times will also be affected by the charging curve for example once charging passes 80%, charging will slow to protect the battery's longevity. The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery. For the 85x battery, the maximum electric power determined in accordance with UN-GTR.21 for this vehicle is 210kW and lasts for a maximum of 30 seconds. For the vRS, the maximum electric power determined in accordance with UN-GTR.21 for this vehicle is 250kW and lasts for a maximum of 30 seconds. The power available will depend upon individual driving behaviour and other non-technical factors, however the maximum power for this vehicle requires in particular a temperature of the high voltage battery between 23-50 degrees Celsius and a battery state of charge greater than 88%. However, in order to preserve the usable capacity of the battery as much as possible, it is recommended to set a charging target of 80% for daily operation and use (which can be switched to 100% before long distance journeys for example). * WLTP combined range.

Loft

Design Selection

The second you take your seat you'll feel at home. It's not a coincidence, as the timeless combo of grey and black is inspired by a stylish living room, as are all the Design Selection interiors. Durability also reigns supreme, with easy to clean materials featured throughout.

Loft interior

Fabric and artificial leather combine to create a classic look that feels perfectly at home in today's always-on world. The dashboard is complemented by grey fabric with stitching, while the aluminium brushed decor on the dashboard and doors adds a striking contrast. Black floor mats and fabric door inserts complete the look.

Front Centre Armrest

Ideal for longer adventures, the durable front centre armrest provides added driver comfort and perfectly complements the interior.

Models shown are not UK specification. Some of the equipment shown is optional. * The seat upholstery consists of a combination of genuine and synthetic leather. The seat cushion, centre panel and backrest of the front row seats and the seats on the left and right of the second row are made from genuine leather. ** Not available on SportLine Plus or VRS.

Suite

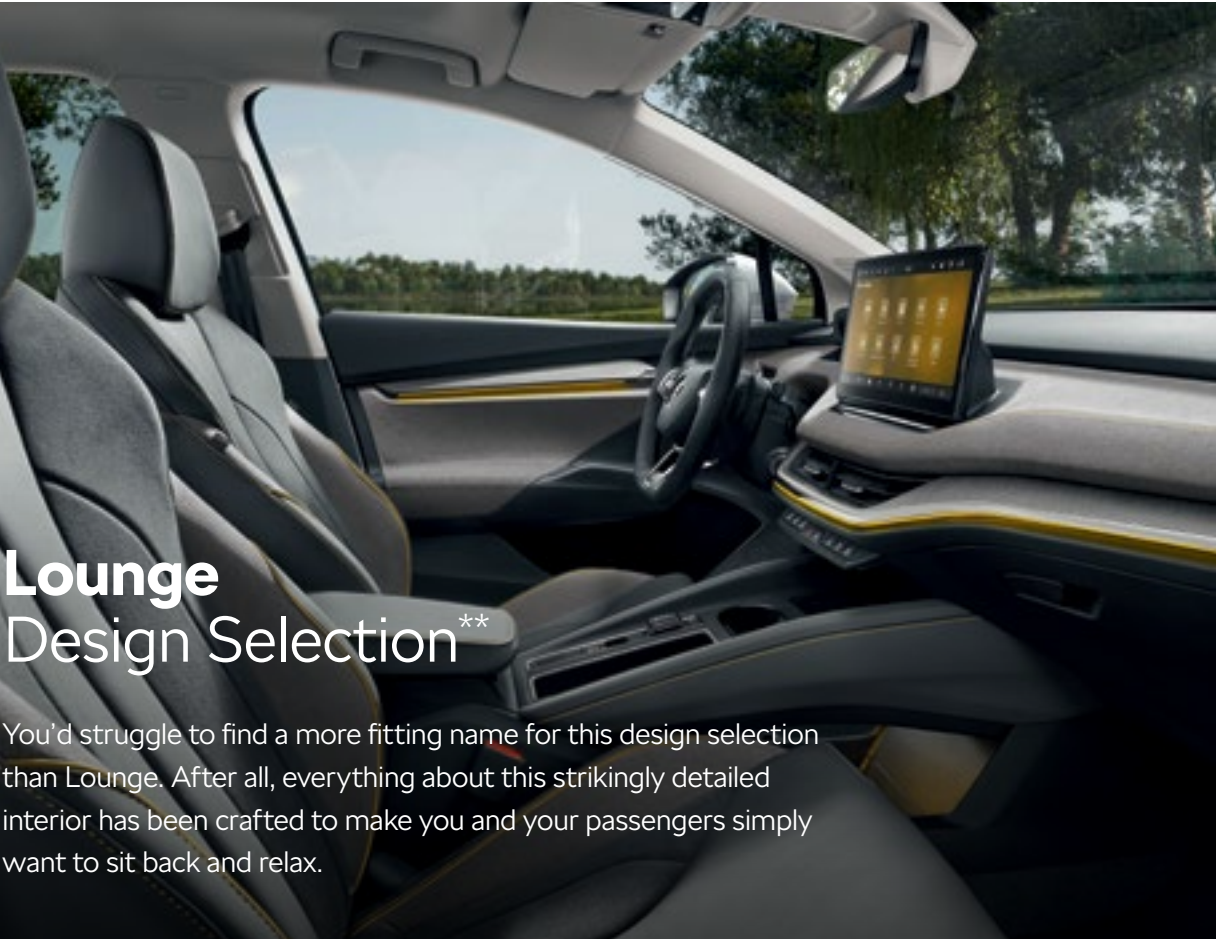

Design Selection**

First impressions count. With this premium design option they'll count for more thanks to the inclusion of soft black leather* throughout which ensures you'll always travel in luxury and arrive in style.

Suite interior

From the piano black décor, to the artificial leather door inserts and black floor mats with piping in cognac brown, this interior options screams quality without ever raising its voice. The black leather upholstery* throughout also provides maximum comfort for all passengers.

Lounge Design Selection**

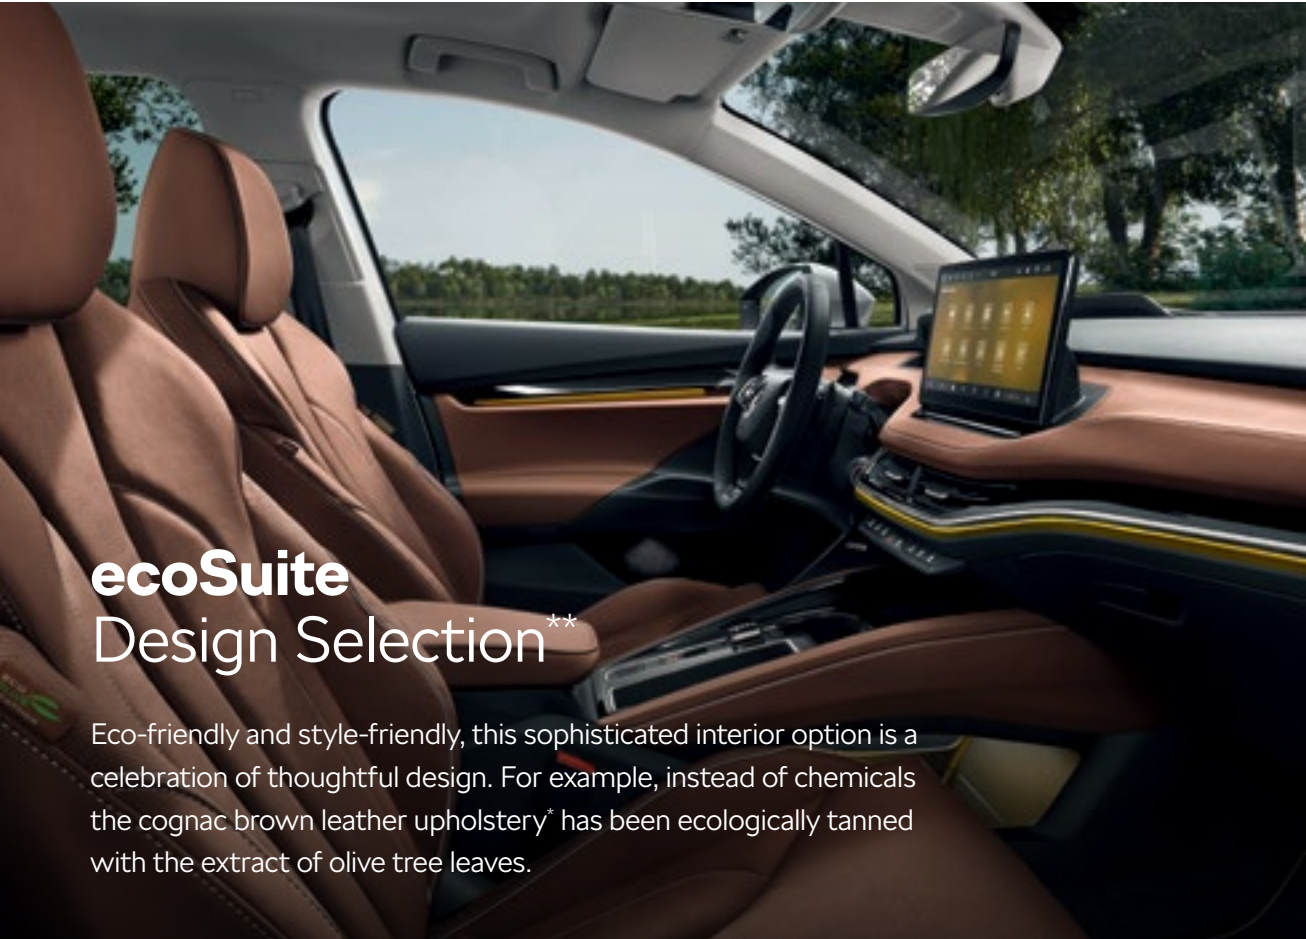

You'd struggle to find a more fitting name for this design selection than Lounge. After all, everything about this strikingly detailed interior has been crafted to make you and your passengers simply want to sit back and relax.

The upholstery features a combination of leather and microfibre with a soft suede finish, while the dashboard is complemented by a microfibre fabric pad and distinctive mustard stitching.

Other design touches includes the Anodised Cross décor on the doors and dashboard, black floor mats with matching stitching and fabric door inserts.

Models shown are not UK specification. Some of the equipment shown is optional. ** Not available on SportLine Plus or vRS.

ecoSuite Design Selection**

Eco-friendly and style-friendly, this sophisticated interior option is a celebration of thoughtful design. For example, instead of chemicals the cognac brown leather upholstery* has been ecologically tanned with the extract of olive tree leaves.

Naturally, comfort hasn't been forgotten either. The olive-tanned leather seats* make long journeys fly by and feature contrasting details in stone-beige. Other interior touches include the cognac brown leatherette door inserts, black floor mats with complementary piping, and the piano black décor on the doors and dashboard.

Models shown are not UK specification. * The seat upholstery consists of a combination of genuine and synthetic leather. The seat cushion, centre panel and backrest of the front row seats and the seats on the left and right of the second row are made from genuine leather. ** Not available on SportLine Plus or vRS.

Models shown are not UK specification. Some of the equipment shown is optional. * May contain some artificial leather. † Only available on SportLine.

SportLine

Design Selection†

The Enyaq Coupé SportLine Plus is as dynamic inside as it is on the outside. Settling into the Microsuede/Leather* front sports seats, you instantly feel ready for action and surrounded by carbon-effect decor, SportLine’s intentions become very clear – high-powered aesthetics coupled with SUV versatility.

SportLine interior

Including exclusive black sports seats with integrated headrests upholstered in Microsuede/Leather* and featuring grey piping. The pedal covers come in an aluminium look and further enhance the SportLine Design Selection. The dashboard is upholstered in a black Microsuede/Leather* with grey contrasting stitching and features carbon-effect decor, which provide visual highlights and can also be found on the door panels.

3-spoke leather heated sports multi-function steering wheel with paddles for recuperation level selection

The 3-spoke leather heated sports multifunction leather sports steering wheel comes as standard and allows numerous vehicle functions to be controlled from its user-friendly buttons and knurled wheels. The leather-covered steering wheel rim features grey contrast stitching, while the lower spoke has a badge bearing the SportLine lettering.

Inspired by an active lifestyle, the vRS Lounge Design Selection combines exclusive durable materials with soft colour accents and sporty elements. The upholstery features a combination of leather/microfibre fabric with lime stitching.

Inspired by an active lifestyle, the vRS Lounge Design Selection combines exclusive durable materials with soft colour accents and sporty elements. The upholstery features a combination of leather/microfibre fabric with lime stitching.

Manufacturer Direct Price

Manufacturer Direct Prices include delivery, 12 months Road Fund Licence, DVLA First registration Fee and apply to the UK only.

VED (Vehicle Excise Duty)

All vehicles will be subject to Vehicle Excise Duty based on the fuel type of the vehicle and its carbon dioxide (CO₂) emissions level, measured in grams per kilometre (g/km). Due to changes in vehicle emissions data, CO₂ figures may differ on these vehicles if taken from current ŠKODA UK stock.

Vehicle Excise Duty (VED) is correct at time of publication, but this may alter to reflect any change in the applicable VED rate.

* This rate applies to diesel cars tested to real driving emissions step two (RDE2) standards.
** This rate applies to diesel vehicles that do not meet the real driving emissions step two (RDE2) standards.

Note: Vehicles with a list price exceeding £40,000 (including factory installed options, delivery charge, number plates and VAT) will pay an additional £390 plus the standard rate VED from year 2 to, and including, year 6. After the 6th year only the standard rate VED will apply.

Pricing valid as of 31st October 2023.

All prices shown are Škoda UK's Manufacturer Direct Price and may vary from time to time (this includes where there are changes in regulation and/or legislation). Vehicle is Sold by Škoda UK, a trading division of Volkswagen Group, United Kingdom Limited. Škoda UK's Manufacturer Direct Price includes: delivery to retailer, number plates, new vehicle registration fee, the first year's Vehicle Excise Duty and VAT (calculated at 20%). There may be a delay in any price displaying correctly on our website and materials and it is always possible that, despite our best efforts, some vehicles may be incorrectly priced. Always obtain prices from your chosen retailer who act as agents on behalf of Škoda UK. Images shown do not reflect the stated entry level prices. The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery. From 1st April 2021 zero emission electric vehicles (BEVs) are zero-rated standard tax for both the first year and all subsequent years.

BiK calculation example

Based on Enyaq Coupé 85 Edition 82kWh 210kW		
P11D value		£46,440.00
Company car BiK tax based on CO ₂ emission level		2%
Taxable BiK (for 2023/2024 tax year):	2% of £46,440.00	£928.80
Annual company car tax (2023/24)		
20% income tax	20% of £895.40	£185.76
40% income tax	40% of £895.40	£371.52
Monthly company car tax (2023/24)		
20% income tax	£179.08 divided by 12 months	£15.48
40% income tax	£358.16 divided by 12 months	£30.96

Company car tax is based on the vehicle's carbon dioxide (CO₂) emissions. The higher the emissions, the higher its tax liability. When a company car is made available for private use a 'Benefit in Kind' value is calculated for tax purposes. The table above will help you calculate your tax liability.

P11D (expenses and benefits)

The P11D value is calculated by taking the Manufacturer Direct Price for the vehicle, less the Road Fund Licence (RFL) and First Registration Fee (FRF).

BiK (Benefit in Kind)

The BiK percentage value is based on the CO₂ emissions of the vehicle for the current tax year 2023/24.

Figures shown are for comparability purposes; only compare fuel consumption, CO₂ and electric range figures with other vehicles tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles, vehicle load and the starting charge of the battery. Figures for battery electric vehicles were obtained after the battery had been fully charged. Battery electric vehicles require mains electricity for charging. Charging times will depend on various factors, including temperature, state of the battery, state of and capabilities of the charging unit and power supply. Actual charging time will vary depending on the level of charge in the battery, as well as environmental conditions. Charging times will also be affected by the charging curve for example once charging passes 80%, charging will slow to protect the battery's longevity. The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery. Data correct at production from 31st October 2023. Choice of wheels and other options may affect consumption and range data. For more information, please see skoda.co.uk/owners/wltp-info or consult your chosen **Škoda Retailer** (who act on our behalf).

Information regarding tyre technical specifications can be found by visiting the Škoda car configurator [here](#).

* The maximum electric power determined in accordance with UN-GTR.21 for this vehicle is 210kW for 85x, 250kW for vRS and lasts for a maximum of 30 seconds. The power available will depend upon individual driving behaviour and other non-technical factors, however the maximum power for this vehicle requires in particular a temperature of the high voltage battery between 23-50 degrees Celsius and a battery state of charge greater than 88%. However, in order to preserve the usable capacity of the battery as much as possible, it is recommended to set a charging target of 80% for daily operation and use (which can be switched to 100% before long distance journeys for example).

** Please note: If a tow bar or tow bar preparation is not fitted on the car, the VIN plate may not show any towing weights and the car will never be eligible for towing. As such it may not be possible to retrospectively fit a tow bar if the car is not fitted with tow bar preparation at Factory. Please speak to your chosen **Škoda Retailer** (who act on our behalf) to confirm the exact towing eligibility.

Additional information

Škoda Lease&Care

Škoda Lease&Care is a leasing agreement with a level of servicing included in your monthly payments, that allows you to drive an Enyaq Coupé without needing to own it.

1. How does it work?

2. Customise your agreement

Once you have chosen your Škoda Enyaq Coupé and decided on your initial payment, you need to make three decisions that will affect your monthly payments:

- 

Contract length
Choose how long you want your Škoda Enyaq Coupé for.
- 

Mileage per year
Choose how many miles you expect to drive each year.
- 

Servicing & maintenance
Choose a Care Package that suits you and your driving style. You can choose from a **Small**, **Medium** or **Large Package**; this will be included in the monthly cost of your Škoda Enyaq Coupé.

 **Lease&Care FAQs**
Find out more

3. Care packages

Choose from three tailored Care Packages.

- Small**
Our Small Care Package covers you for essential servicing:
 - > All routine manufacturer servicing
 - > Brake fluid changes
 - > Dust and pollen filters
 - > Driverline concierge service
 - > Roadside Assistance
 - > Optional VWFS Rent-a-Car allowance of a non-electric vehicle
- Medium**
This includes everything in Small plus all routine manufacturer maintenance which covers you for:
 - > Brake, suspension and cooling system repairs
 - > Electric system maintenance
 - > All fluid top-ups
- Large**
This includes everything in our Small and Medium Care Packages but also covers you for:
 - > Tyre replacement and wheel alignment (due to fair wear and tear)
 - > Puncture repair
 - > Geometry check and wheel balance

An offer of finance depends on certain conditions. Subject to status. Available to 18s and over in the UK only. Terms and conditions apply. ŠKODA Financial Services.
